Washington, D.C. 20505

Critical Intelligence Problems Committee

4 June 1986
DDW-169

WEEKLY ACTIVITIES & STATUS REPORT FOR THE DD/ICS--4 June 1986

CIPC Organizational Activities

- During the week, the following CIPC working groups met or are scheduled to meet:
 - NFIP Support to Contingency Operations; 3/5 June.
 - Intelligence Support to SDI; 3 June.
- 25X1
- Force Multiplier; 29 May/8 June.
- Rosemary reported for duty as our senior secretary on 2 June.

NFIP Support for Contingency Operations -

25X1

25X1

- Since the first meeting in late April, the working group has concentrated on ensuring that the members have an understanding of the different activities within the Community that are associated with providing intelligence support to U.S. military forces. Although considerable progress has been made with twice weekly meetings and the DIA LIC symposium, many other subjects and activities still need to be explored. To this end, the working group has tentatively scheduled briefings and related discussions through the third week of June. Meanwhile, the working group will be reviewing the draft study outline that was mailed to members last week. Once that has been coordinated, specific input will be requested.

WEEKLY ACTIVITIES & STATUS REPORT FOR THE DD/ICS--4 June 1986

25X1

CSEM - []

25X1

- Work on programming the CSEM prototype is progressing well- [] reports no problems so far. The plan is to progress the original, "base" model first, test and debug it, then incorporate as appropriate the more sophisticated algorithms to accommodate coordination between INTs and credit for repetitive collection as specified in the technical papers.

25X1

Force Multiplier Study - []

25X1

- The draft terms of reference (TOR) has been circulated for comment or concurrence by the working group members.

25X1

Intelligence Support to SDI []

- The SDI Working Group met on 3 June to hear the results of the ICS/PPS study of the SDIO's requirements and to hear status reports from the members on their attempts to elicit comments from other SDI intelligence customers. [] gave a very full account of what he has done but not all the responses to the D/ICS memorandum will arrive before 6 June.
- Rich reports that the working group members are no longer as negative on the potential value of a CIPC study on this subject--the attitudes now range from neutral to positive. If we get the inputs from PPS this week, we can probably stay on schedule as specified in the TOR.
